SUMMARY

Full Stack Developer trained in JavaScript, React, Node.js, SQL, and agile methodologies. I have experience developing dynamic web applications integrating APIs, as well as administrative management and team coordination, always focusing on accuracy and efficiency. I am motivated to deliver innovative solutions and to keep growing through collaborative projects.

SKILLS

JavaScript, TypeScript, HTML/CSS, React, GitHub, APIs, Node.js, Express, SQL

WORK EXPERIENCE

Accounts and Management Control Officer | Plaza Capital

08/2023 – 05/2025, Buenos Aires, Argentina

- Controlled and recorded accounts, transactions, and updated balances in the system.
- Coordinated team tasks to improve the accuracy and availability of financial information.
- Performed regular bank reconciliations and oversaw key processes in collaboration with the team.
- Developed organizational and leadership skills applicable to web project development.

Administrative Assistant | HCDN

01/2017 – 03/2022, Buenos Aires, Argentina

- Managed and filed documents, material requests, and invoicing.
- Coordinated with different departments to ensure efficiency and timely delivery.
- Updated records in the system while maintaining data integrity and accuracy.
- Developed multitasking and teamwork skills.

Tester QA | BidCom

08/2016 – 12/2016, Buenos Aires, Argentina

- Verified proper functioning of electronic devices.
- Prepared reports on failures and proposed corrective actions.
- Coordinated with the technical team to resolve recurring issues.

Administrative | Telas e Ideas SRL

04/2015 – 07/2016, Buenos Aires, Argentina

- Managed invoicing, banking procedures, and supplier relations.
 - Organized physical and digital files to maintain updated documentation.
 - Communicated with clients and suppliers to resolve inquiries and coordinate deliveries.
-

PROYECTS

Media Heaven

[See live](#) | [Source code](#)

- E-commerce platform for video games, where users can register as customers or administrators. Developed with JavaScript, React, Express.js, and SQL, it integrates APIs to create a dynamic, seamless shopping experience and to allow administrators to efficiently manage inventory and user interactions.

Mercado Liebre

[See live](#) | [Source code](#)

- A basic e-commerce website inspired by Mercado Libre, developed as an introductory web development project. Focused on establishing the fundamentals of web design with HTML and CSS, emphasizing structure, layout, and styling. My first project, which helped me understand the basics of creating and styling web pages, simulating a real-world application.

EDUCATION

Full Stack Developer | DIGITAL HOUSE

03/2023 – 12/2023, Buenos Aires, Argentina

- Participated in an intensive 450-hour bootcamp, acquiring and applying skills in technologies such as JavaScript, Node.js, HTML, CSS, Express, React, SQL, and GitHub. Developed both group and individual projects utilizing the Scrum methodology, promoting collaboration and efficient project management.

High School | COLEGIO DE LA PROVIDENCIA

03/2003 – 12/2014, Buenos Aires, Argentina

LANGUAGES

Spanish (Native)

English (B2)

WORKING HOLIDAY

04/2022 – 03/2023

- Spent one year in Germany on a Working Holiday, performing various jobs. I worked in restaurant service, warehouse operations at Rewe and Amazon, and as a delivery driver, where I communicated in English daily, worked under pressure, and adapted quickly to different teams and environments.
